A MESSAGE FROM MANAGEMENT

Building with Purpose

Bidding a better Tomorrow.

ARVANTA Infrastructure & Construction Ltd. was established in 2015 with a clear ambition: to become a dependable partner in the development of infrastructure and the built environment.

We understand that construction is about more than completing a physical structure. It is about creating places that work, infrastructure that connects people, and facilities that support communities, businesses and economic activity.

For this reason, our approach begins with understanding the client's requirements and continues through careful planning, technical coordination, responsible construction and professional project management. We believe that lasting results come from paying attention to both the larger objective and the details that determine how a project performs.

As a growing organization, ARVANTA is focused on developing strong technical capabilities, professional systems and long-term relationships with clients, consultants, suppliers and development partners.

Our ambition is to build a company whose reputation comes from the quality of its work, the professionalism of its people and the responsibility with which it conducts every assignment.

We look forward to building that reputation through the opportunities ahead.

Management

ARVANTA Infrastructure & Construction Ltd.

ARVANTA

COMPANY OVERVIEW

Who We Are

ARVANTA Infrastructure & Construction Ltd. is an engineering and construction company established in 2015, focused on infrastructure development, building construction, civil engineering and project-related services.

The company was established with a long-term view of the opportunities and responsibilities associated with Somalia's developing construction sector. Our work is guided by a practical understanding of project delivery: work needs to be properly planned, technically coordinated, carefully managed and executed with attention to quality and safety.

ARVANTA brings together engineering, construction and project-management capabilities to support clients through different stages of development. Depending on the requirements of an assignment, our role can extend from initial planning and technical coordination through procurement, construction, supervision, quality control and completion.

We are building the organization around a professional culture where responsibility is as important as technical ability. Clear communication, disciplined management, dependable workmanship and constructive relationships are central to the way we intend to work.

Our Business Focus

Infrastructure Development

Civil works and supporting infrastructure designed around practical project requirements.

Building Construction

Construction solutions for commercial, residential, institutional and public-use facilities.

Engineering Services

Technical planning, engineering coordination, design support and construction-related consultancy

Project Management

Structured coordination of time, resources, people, materials and project requirements.

ARVANTA

OUR VISION & MISSION

VISION & MISSION

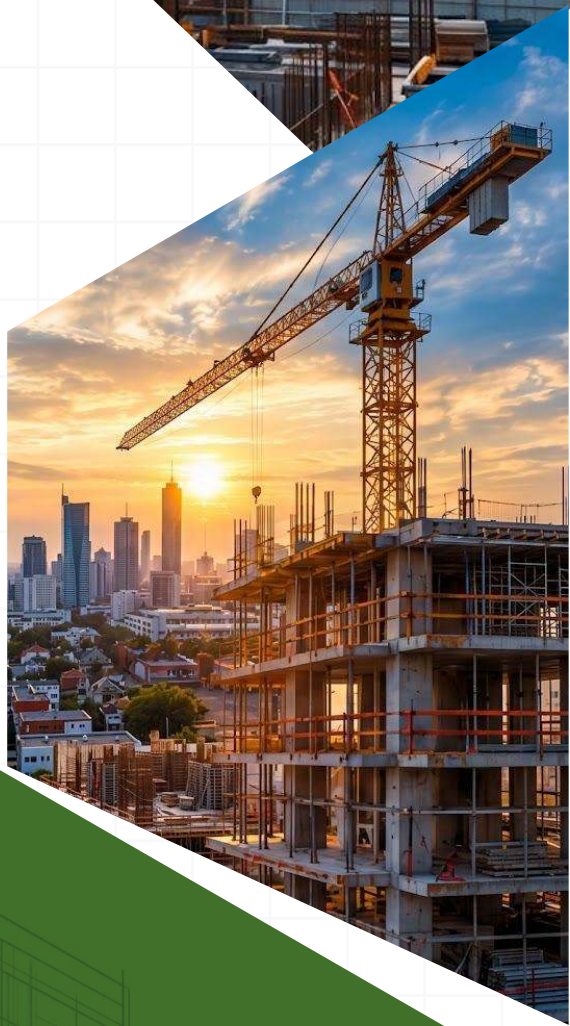

VISION

To become a trusted infrastructure and construction company, recognized for professional delivery, technical capability, responsible practices and meaningful contribution to Somalia's development.

MISSION

To provide reliable engineering and construction solutions through skilled people, sound technical practices, disciplined project management and a strong commitment to quality, safety and client satisfaction.

OUR VALUES

Our values guide how we work, the decisions we make and the relationships we build.

Integrity

We believe trust is earned through honest communication, responsible decisions and consistency between what we promise and what we deliver.

Quality

Quality is built into the process. We pay attention to planning, materials, workmanship, supervision and the details that determine the performance of a completed project.

Professionalism

We approach our work with discipline, respect and accountability, from the first conversation with a client to final completion.

Responsibility

We recognize our responsibility to clients, employees, partners, communities and the environments in which we work.

Safety

A successful project must protect the people involved in delivering it. Safety is therefore an essential part of how we plan and manage our work.

Collaboration

Construction is a collective effort. We work with clients, consultants, suppliers, contractors and communities to solve problems and achieve shared objectives.

Continuous Improvement

As an evolving organization, we remain open to learning, improving our systems and developing the people and capabilities behind the business.

ARVANTA

Integrated Engineering &
Construction Solutions

OUR SERVICES

ARVANTA provides engineering, construction and infrastructure services designed around the practical needs of each project. Our approach allows different services to be combined where required, creating a coordinated path from early planning through construction and completion.

Civil Engineering & Infrastructure

Civil engineering is at the core of effective infrastructure development. ARVANTA supports civil works that require practical planning, site coordination and reliable construction.

- Site preparation and development
- Earthworks and excavation
- Grading and leveling
- Roads and access routes
- Drainage systems
- Culverts and crossings
- Concrete and civil structures
- Foundation-related civil works
- External site development
- Infrastructure rehabilitatio

Our focus is on developing solutions that respond to actual site conditions, intended use, durability requirements and available resources.

ARVANTA

OUR SERVICES

Building Construction

ARVANTA provides construction services for buildings across residential, commercial, institutional and public-use environments.

Our construction scope can include:

- Site preparation
- Foundation works
- Reinforced concrete structures
- Columns, beams and slabs
- Masonry works
- Roofing systems
- Flooring and tiling
- Doors and windows
- Plastering and finishing
- Painting
- Plumbing coordination
- Electrical coordination
- External works

We approach building construction as a coordinated process in which structural work, architectural finishes, building services and external works need to come together properly.

Structural Engineering

A sound structure begins with appropriate planning and technical coordination.

ARVANTA's structural capabilities include:

- Structural planning and coordination
- Foundation-related requirements
- Reinforced concrete structures
- Steel structures
- Columns and beams
- Slabs and structural framing
- Structural detailing
- Technical coordination
- Construction-stage support
- Structural assessment support

Our objective is to ensure that structural requirements are properly understood and coordinated with the architectural and construction elements of a project.

ARVANTA

OUR SERVICES

Engineering Design & Consultancy

Good construction decisions begin before work reaches the site.

ARVANTA can provide technical support during the early and development stages of projects, helping clients and project teams establish practical requirements and coordinate technical information.

Services may include:

- Site assessment
- Concept development
- Preliminary planning
- Engineering coordination
- Technical drawings
- Architectural coordination
- Structural coordination
- Technical specifications
- Plastering and finishing
- Cost planning support
- Construction documentation
- Design review

Where specialist professional input is required, the appropriate disciplines can be coordinated within the project framework.

Roads & Transportation Infrastructure

Reliable roads and access infrastructure are essential to connecting communities, supporting commerce and improving movement.

ARVANTA can undertake road-related civil works including:

- Access roads
- Internal development roads
- Road rehabilitation
- Earthworks
- Subgrade preparation
- Drainage
- Culverts and crossings
- Roadside works
- Concrete road elements
- Supporting site infrastructure

Our approach considers the intended use of the road, site conditions, drainage requirements and long-term functionality.

OUR SERVICES

Water Supply & Sanitation

Water and sanitation infrastructure plays a fundamental role in creating functional and healthy communities.

Our construction and civil capabilities can support:

- Water distribution systems
- Utility trenches
- Preliminary planning
- Pipe installation support
- Drainage systems
- Sanitation infrastructure
- Wastewater-related civil works
- Pumping-related civil works
- Rehabilitation of existing systems

We emphasize appropriate coordination between civil works, utility requirements and the operational needs of the completed facility.

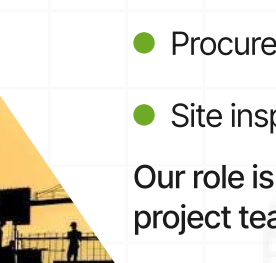

Project Management & Construction Supervision

Good construction requires more than physical execution. It requires people, materials, schedules, information and decisions to be coordinated effectively.

ARVANTA's project management and supervision services can include:

- Project planning
- Construction scheduling
- Mobilization
- Resource coordination
- Contractor coordination
- Procurement coordination
- Site inspections
- Progress monitoring
- Quality monitoring
- Technical coordination
- Client reporting
- Project documentation
- Completion and handover

Our role is to provide structure and visibility throughout the delivery process so that project teams can identify issues early and respond appropriately.

ARVANTA

OUR SERVICES

Renovation, Rehabilitation & Maintenance

Existing facilities often require improvement, repair or adaptation rather than complete replacement.

ARVANTA can support renovation and rehabilitation works including:

- Building refurbishment
- Structural repairs
- Roofing works
- Flooring and tiling
- Interior improvements
- Exterior improvements
- Plumbing coordination
- Electrical coordination
- Facility upgrades
- Civil infrastructure rehabilitation
- Maintenance-related works

We consider the existing condition of the facility, its operational requirements and its intended future use when planning rehabilitation work.

Procurement & Construction Support

Construction performance is closely connected to the timely availability and suitability of materials, equipment and other resources.

ARVANTA can support project procurement and construction logistics through:

- Material planning
- Supplier coordination
- Sourcing support
- Delivery coordination
- Material inspection
- Equipment coordination
- Site logistics
- Storage planning
- Procurement documentation

The objective is to create better continuity between project planning, procurement and actual site execution.

ENGINEERING & CONSTRUCTION

CAPABILITIES

Planning & Technical Coordination

We begin by understanding the project requirement, site conditions, technical expectations and intended outcome. This provides the foundation for a practical implementation strategy.

Construction Management

Construction requires continuous coordination between people, materials, equipment, subcontractors and schedules. Our management approach is designed to keep these elements aligned with the project objectives.

Site Supervision

Effective supervision provides visibility over workmanship, progress, safety and compliance. It also creates an opportunity to identify practical issues before they become larger problems.

Quality Control

We consider quality throughout the project lifecycle, from material selection and technical coordination to workmanship, inspection and corrective action.

Procurement & Resource Management

We recognize that delays and interruptions can affect both cost and programme. Proper resource planning and supplier coordination are therefore important parts of project preparation.

Documentation & Reporting

Clear documentation supports accountability and allows clients and project teams to make informed decisions throughout the project.

ARVANTA

OUR APPROACH TO

PROJECT DELIVERY

01 Understand

02 Plan

03 Coordinate

04 Procure

05 Construct

07 Complete

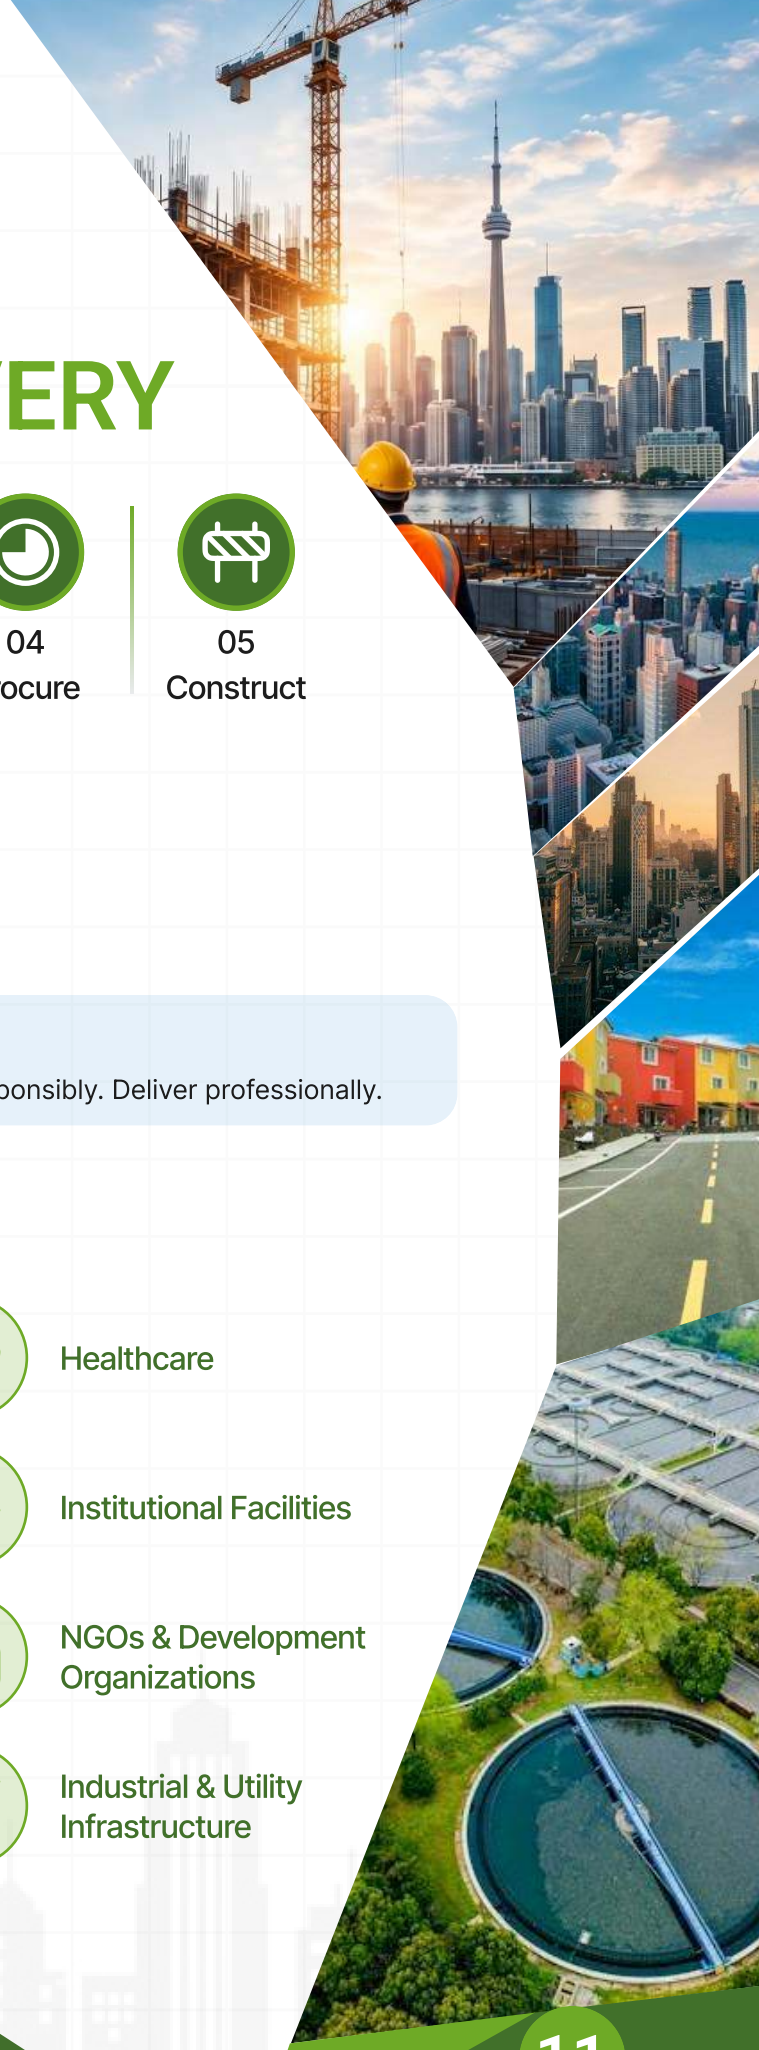

08 Handover

Our Delivery Principle

Understand clearly. Plan carefully. Build responsibly. Deliver professionally.

SECTORS WE SERVE

- Government & Public Infrastructure
- Healthcare
- Commercial Development
- Institutional Facilities
- Residential Development
- NGOs & Development Organizations
- Education
- Industrial & Utility Infrastructure

ARVANTA

QUALITY, HEALTH, SAFETY &

ENVIRONMENT

Responsible Construction

We believe that a successful project must deliver more than a physical result. It should be carried out responsibly, with appropriate attention to the people involved, the quality of the work, the use of resources and the surrounding environment.

Health & Safety

Safety is incorporated into the way we organize and manage construction activities.

Our focus includes:

- Safe site organization
- Appropriate personal protective equipment
- Safe handling of materials and equipment
- Controlled site access
- Worker awareness and supervision
- Identification of site risks
- Incident prevention and reporting

Quality

Quality is considered throughout the project rather than only at completion.

Our quality focus includes:

- Appropriate materials
- Sound workmanship
- Technical supervision
- Inspection and monitoring
- Compliance with project requirements
- Corrective action
- Proper documentation

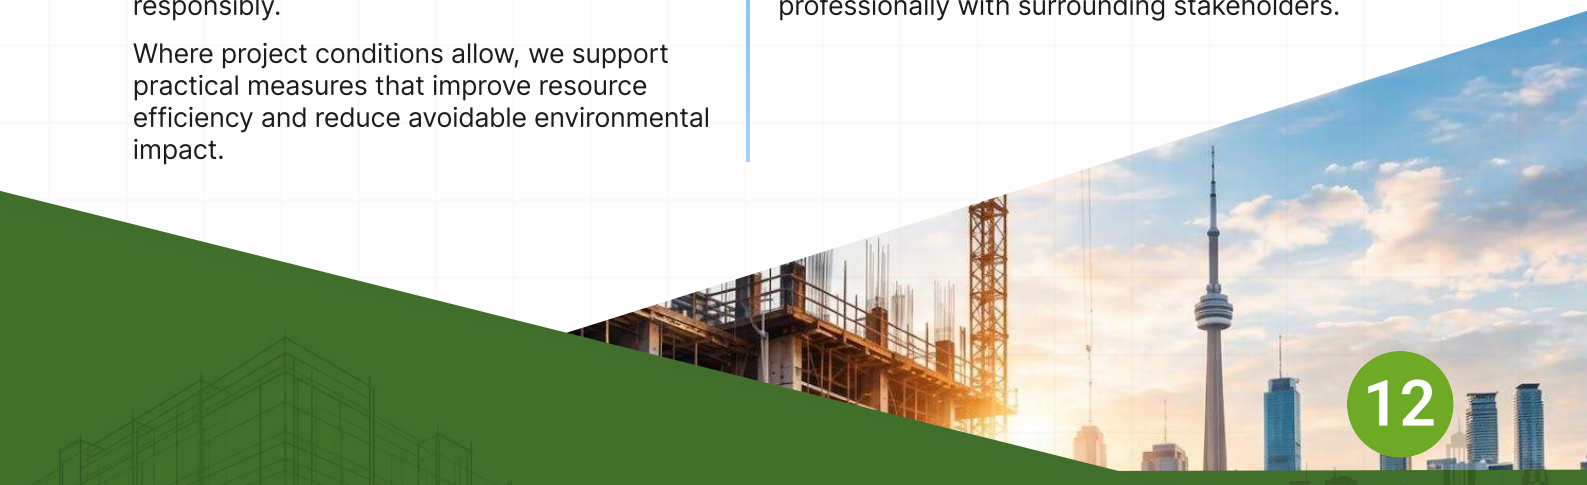

Environmental Responsibility

Construction inevitably interacts with its surrounding environment. We therefore seek to maintain orderly sites, reduce unnecessary waste and use materials and resources responsibly.

Where project conditions allow, we support practical measures that improve resource efficiency and reduce avoidable environmental impact.

Community Responsibility

We recognize that construction projects operate within real communities. We aim to minimize unnecessary disruption, maintain respectful relationships and communicate professionally with surrounding stakeholders.

BUILDING OUR

PROJECT PORTFOLIO

A New Stage of Growth

ARVANTA Infrastructure & Construction Ltd. was established in 2015 and is now focused on developing its project portfolio and strengthening its presence within the infrastructure and construction sector.

ARVANTA Infrastructure & Construction Ltd. was established in 2015 and is now focused on developing its project portfolio and strengthening its presence within the infrastructure and construction sector.

At this stage, ARVANTA has not completed a formal project portfolio that is being presented as established experience. We believe it is important to communicate this clearly rather than fill a company profile with unverified project claims.

Our focus is now on creating opportunities through professional capability, partnerships and disciplined project delivery.

Areas We Are Positioned to Pursue

- Technical Capability
- People Development
- Project Systems
- Project Delivery
- Sustainable Growth

CLIENTS & PARTNERSHIPS OUR

CLIENTS & PARTNERSHIPS

Relationships Built on Trust

Construction is a collaborative business. Successful projects depend on the relationship between the client, consultant, contractor, suppliers, specialist teams and other stakeholders.

ARVANTA aims to build professional relationships based on:

Clear Communication

We believe project information should be communicated clearly and at the right time.

Technical Cooperation

We work constructively with engineers, architects, consultants, specialists and other project stakeholders.

Transparency

We support clear processes, appropriate documentation and open professional communication.

Professional Conduct

We respect contractual responsibilities and the professional role of every party involved in a project.

Reliability

We take commitments seriously and aim to respond to project requirements in a responsible and timely manner.

Long-Term Partnership

Our objective is to build relationships that can develop beyond a single assignment.

Our Target Client Groups

- **Government institutions**
- **NGOs and development organizations**
- **Private companies**
- **Property developers**
- **Institutional organizations**
- **Commercial clients**
- **International and local partners**
- **Engineering and architectural consultants**

OUR FUTURE DIRECTION

Growing Capability. Creating Value.

ARVANTA's future is focused on developing the capabilities required to participate in increasingly significant infrastructure and construction opportunities.

Strengthening Technical Capacity

We will continue developing our engineering, construction and project-management capabilities.

Developing Our People

We intend to invest in professional development, practical experience and a culture of continuous learning.

Improving Project Systems

We will continue strengthening project management, procurement, quality, safety, documentation and financial controls.

Expanding Professional Partnerships

We aim to build relationships with consultants, suppliers, contractors, development organizations and clients.

Building a Strong Project Record

Our experience will be built through actual project delivery. Each completed assignment will contribute to the development of our people, systems and reputation.

Supporting Development

Our long-term ambition is to participate in projects that improve infrastructure, support economic activity and create better environments for communities.

OUR COMMITMENT

OUR COMMITMENT

ARVANTA is committed to building a company that clients and partners can work with confidently.

That commitment begins with understanding the assignment and continues through planning, coordination, construction and completion.

We know that a company's reputation is not created by words alone. It is built through everyday decisions: how a team responds to a problem, how a commitment is handled, how quality is protected and how people are treated throughout a project.

For ARVANTA, these details matter.

> **We are building our organization with the intention of creating lasting professional relationships and delivering work that can stand on its own quality.**

Professional in Approach.

Responsible in Action.

Focused on What We Build.
